COMPANY OVERVIEW

SyTech Solutions is a distinguished Minority-Owned company that excels in providing comprehensive information technology consulting services, placing a strong emphasis on Cybersecurity. Committed to excellence and innovation, we are dedicated to delivering customized solutions for the maintenance, optimization, and scalability of Information Systems. Our certified team ensures the highest standards of service, making us a trusted partner for organizations seeking cutting-edge and secure IT solutions

CORE COMPETENCIES

Cybersecurity Expertise: Our dedicated team of highly experts ensures the highest level of protection for your digital assets through cutting-edge cybersecurity measures.

Information Technology Consultation: We offer strategic guidance and consultation services to navigate the complex landscape of information technology, aligning your business goals with technological advancements.

Optimization and Scalability Solutions: We specialize in designing and implementing solutions that optimize your existing infrastructure and enhance scalability to meet the evolving needs of your organization.

DIFFERENTIATORS

- | | |
|---|---|
| ✓ Information Assurance Risk Assessment | ✓ Enterprise Data Management |
| ✓ Security Compliance Management | ✓ Back-up and disaster recovery |
| ✓ IPS/IDS (Active Intrusion prevention/detection) | ✓ RMF, ATO, POAMs, and NIST |
| ✓ Risk and Vulnerability Analysis | ✓ Vulnerability assessment and management |
| ✓ Network Security Monitoring and Assessment | ✓ ICAM and Audit Readiness |
| ✓ Management and Technical Services | ✓ Infrastructure and Endpoint hardening |

PERFORMANCES

- ✓ **Defense Health HQ** - Sytech has demonstrated a proactive and comprehensive approach to cybersecurity by effectively managing and mitigating vulnerability findings across both production and development servers. Their implementation of security software for applications and computer management in new domains underscores their commitment to staying ahead of potential threats. Sytech's adept monitoring of Infrastructure Security, employing technologies such as Juniper UAC 802.1x authentication, F5 Load Balancer, Symantec Mail Security for MS Exchange, and overseeing PKI and SSL certificate renewals for servers and applications, reflects a robust defense strategy. Furthermore, their proactive stance is evident in the regular reporting of vulnerability and risk findings through monthly maintenance reports, showcasing their dedication to continuous evaluation and implementation of updates for Information Systems.
- ✓ **US Marine Corps Technology Management Branch** - SyTech has been instrumental in advancing cybersecurity efforts for the Marine Corps, particularly in achieving **Authorization to Operate (ATO)** through the **Risk Management Framework (RMF)**. Specializing in proactive cyber hunting, our team has demonstrated proficiency in transitioning from DIACAP to RMF, playing a pivotal role in facilitating certifications and accreditation reviews. We have provided crucial support to INFOSEC systems by conducting comprehensive analyses and defining robust security requirements. Additionally, SyTech has actively participated in testing and managing cryptographic products, trusted networks, and database management systems. Our commitment to enhancing the overall cybersecurity posture is evident through thorough penetration testing, analysis, and risk assessments. The proactive measures taken by SyTech contribute significantly to ensuring the security and resilience of Marine Corps systems. Demonstrating our commitment to excellence, SyTech provides comprehensive RMF lifecycle support to a diverse range of FM systems, varying in complexity. Moreover, our involvement in the Marine Corps enterprise-wide rollout of the FM Overlay underscores our dedication to shaping and reinforcing the financial security landscape for the Marine Corps.
